# Our ambition.

Transition from 110 V to 220 V, development of electric heating during the oil crises, introduction of electronics to better manage consumption, transition to new energies... as a major player in thermal comfort for nearly 70 years, we have always successfully anticipated societal and environmental transitions.

We strive to promote renewable energies, reduce energy consumption and CO2 emissions. We favor low-carbon electricity, apply a zero discharge policy and strengthen local industry thanks to our territorial roots.

Our connected electric heating solutions, heat pumps, thermodynamic water heaters for housing, commercial and industrial buildings are unrivaled to date, making us the recognized specialist in optimized energy consumption.

## **Our commitment**

Innovate every day to make buildings smarter, more connected and more sustainable.

## **Our pride**

Designing and producing in France, claiming Origine France Garantie certification of our products and promoting the local economy.

## **Our promise**

Bring more comfort with less energy.

To offer you a simple and intuitive use of our thermal comfort solutions, promote the energy transition and allow you to save money, we are transforming ourselves by imposing simplicity on ourselves.

Group Muller and its professional brands  
Airelec, Applimo, Auer, Campa, France Energie, Muller Intuitiv and Noirot  
become intuitis.

Clients, distributors, partners, colleagues :  
let's take on all these new challenges together!

« Locally  
develop  
innovative  
and efficient  
thermal  
comfort  
solutions for all  
living spaces. »

# Our mission.

intuis is an industrial group implanted in France, with the majority of its products certified Origine France Garantie.

intuis is present in residential, industrial and commercial building markets, with expertise and specific offers for each segment.

To guarantee our promise « More comfort, less energy », we constantly innovate to create products with energy efficiency levels amongst the best in the market.

At intuis, we work in strong collaboration with our partners, installers, specifiers, maintenance and operational professionals.

intuis is the French brand of Glen Dimplex Group, an Irish, privately-owned, industry leader.

A woman with blonde hair tied back is sitting on a large, plush brown sofa. She is looking out a large window with vertical blinds. The room is dimly lit, with light coming from the window. The sofa has several large, patterned cushions. The overall mood is calm and contemplative.

a fight in  
the name of  
progress  
for all »

**More comfort,**

Because comfort is subjective, sensitive, and connected, with intuitis the experience of comfort is intended to be intuitive.

# Our promise.

# less energy.

Because the best technology is the one that is placed at the service of energy performance, with intuitis, energy is virtuous.

better innovate. »

# Our industrial model.

An original industrial model that promotes innovation.

- We control the value chain, both upstream and downstream, to :
  - promote agile innovation ;
  - protect know-how ;
  - guarantee quality ;
  - maintain flexibility.
- We are constantly investing in our industrial tools and ultra modern, efficient and competitive laboratories :  
more than €150M invested over 10 years.
- We train and bring meaning to individual careers.

« The whole  
intuis ecosystem  
at your side. »

# the anchor of our ecosystem.

Present for nearly 70 years in France, intuitis has developed a partner network of developers, landlords, builders, distributors, installers, etc. who work for the energy transition through the renovation of buildings.

With this ecosystem, intuitis aims to simplify consumer access to technologies that reduce their environmental footprint and energy expenses.

intuitis trains the industry from the installation to the use of its technologies: 3 training centers and Qualiopi certification.

intuitis brings its support to contractors so as to bring more comfort with less energy : a specification team advises.

# Our solutions.

## High energy performance solutions.

### **Heat pumps for single-family homes, collective dwellings, thermodynamic water heaters.**

intuis thermodynamic solutions meet the needs of consumers, developers, landlords and companies to improve the energy efficiency of their buildings, while guaranteeing a level of comfort and air quality.

With a very low impact on the environment, our heat pumps produce hot water and heating that are both more ecological and more economical using air as the main source of energy.

## Intelligent electric heating solutions.

### **Room heaters & heated towel-rails**

In collaboration with Netatmo, we developed a smart remote control solution for our electric heaters.

For greater comfort, intuis connect with Netatmo allows you to adjust, with your finger and with your voice, the temperature of each room to the nearest degree.

For greater savings, our connected solution offers users the possibility to follow their consumption in real-time or adjust comfort settings thanks to suggestions from our self-learning algorithm.

## Commercial & industrial solutions.

### **Waterloop heat pumps**

To meet the challenges of sustainability, intuis has set up an offer adapted to commercial and industrial buildings: heat pumps working on a water loop. These unique 4 in 1 solutions ensure air renewal, thermal heat recovery, heating and cooling. These carry 3 main benefits : healthy indoor air quality, optimal individual temperatures, and energy savings.

# Intuitively,

**adverbe : « instinctively ».**

intuis draws its name from the roots of the word intuition to signify that intuitive use is first the result of expert, technical intelligence, complemented by a streamlined experience.

# Our pillars.

## Simplicity.

intuis creates value with a demand for simplicity in all aspects of the business. For intuis, simplicity means facilitating all steps from installation and maintenance, to the use of the products and the user experience.

## Responsibility.

The responsibility of intuis is embodied by a local and territorial commitment, and a desire to protect the environment. It is based on transparency vis-à-vis its employees, partners and customers.

## Innovation.

At intuis, innovation is both technological and experiential. It only makes sense if it brings real progress for the greatest number. We have a large team of engineers and researchers in 5 research centers in France who work every day to provide more comfort with less energy.

« the duty of  
simplicity as a driver of  
high performance. »

# Simplicity.

Our duty is expressed in particular through...

## **Our technologies.**

- Monobloc heat pumps without fluorinated gases, and easily installable, even by non-refrigeration professionals
- A market-acclaimed, simple and intuitive app to control your heaters and water heaters.

## **The merging of our brands.**

- A new professional brand to present global thermal comfort solutions.

**The transformation of our organisation and our internal processes to facilitate cross-functionality and efficiency.**

« Promote Made in France and protect our environment. »

# Responsibility.

intuis has always protected industrial sovereignty, and strives to maintain local employment and promote industrial know-how in France.

- We actively hire new talent to support our growth.
- We train and develop competencies and skills.
- We massively invest in our industrial tool.

70% of our production is certified Origine France Garantie (OFG) : the only guarantee of a truly French and high-quality manufacturing.

- First certification OFG of a French-produced heat pump in 2021.
- Participation at the Grand Exposition of Made in France – Élysée 2021.
- Grand Prize of Innovation at the Made in France show 2021.
- OFG Environment Prize 2022.

We took the turn towards renewable energies more than 10 years ago, and made the early and demanding choice not to use fluorinated gases.

We apply a zero-rejection policy on our sites.

We embarked early on the adventure of connectivity to ensure our customers control of their consumption.

« Constant reinvention  
and focus on  
technologies of  
tomorrow. »

# Innovation.

Our 130 patents are the result of our massive investments in R&D, our inventiveness and the work of our researchers.

Innovation is based on 5 cutting-edge research centers located in France and integrated into the heart of our production sites.

For 10 years, we have developed our capacities and opened 3 Labs, whose vocation is to promote open innovation, the co-design of products and solutions in a spirit of collaborative research.

- intuitis is the first French manufacturer to have marketed a complete range of heat pumps and thermodynamic water heaters without fluorinated gases:
  - in 2009, we registered the patent for our 100% French produced, high performance heat pumps without fluorinated gases ;
  - in 2010, 5 patents were granted for the range of water heaters without fluorinated gases, benefiting from a breakthrough innovation on heat exchangers.
- intuitis has the largest R&D center in Europe accredited by the LCIE for thermodynamic systems.
- Thanks to the early development of connectivity in radiators, intuitis saw its app acclaimed by the market and awarded at the CES in Las Vegas in 2018 in the «smart home» and «sustainable technologies» categories. .
- The SETS (Seasonal Electro-Thermal Storage) project a won the “Innovation 2030” World Competition in the “energy storage” category.
